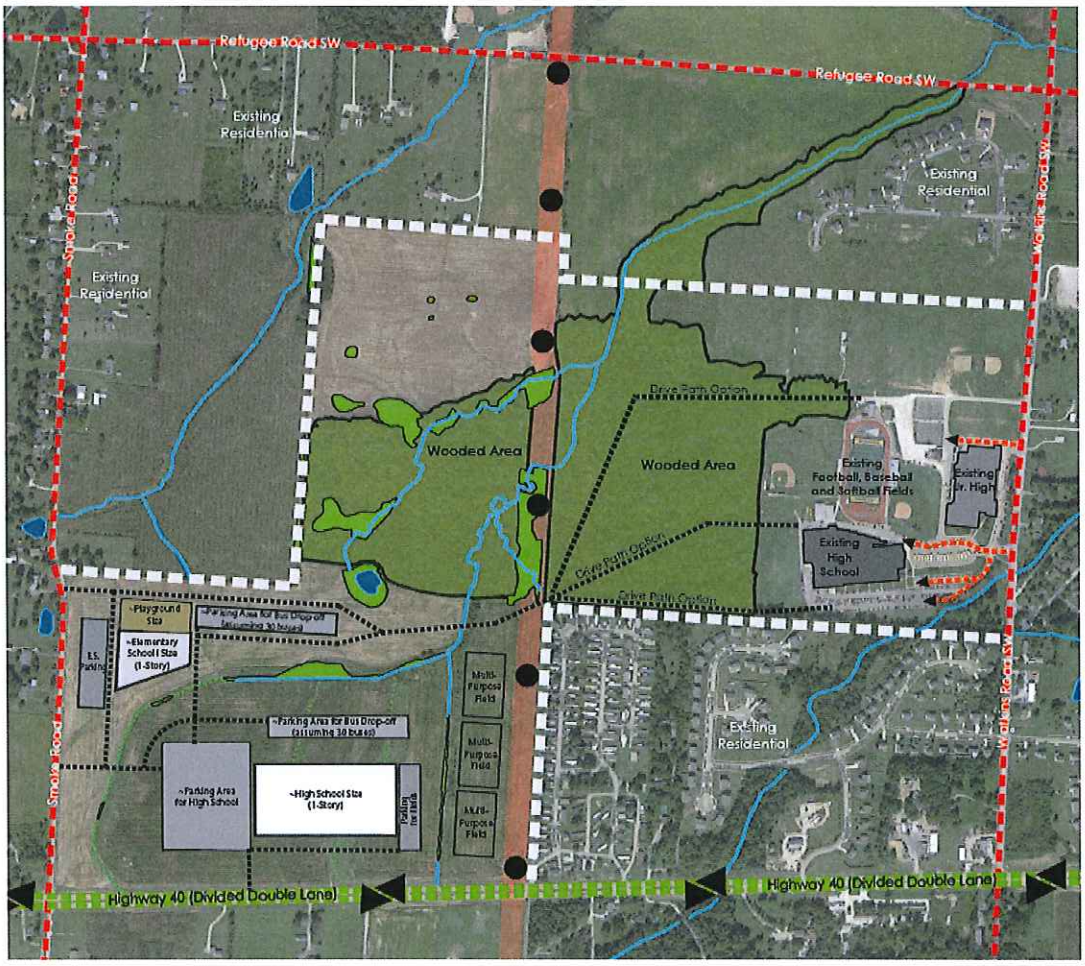
Southwest Licking Local Schools

JUST THE FACTS

By Robert T. Jennell, Superintendent

The master plan approved by the Ohio Facilities Construction Commission and the Southwest Licking Board of Education includes the construction of a new high school (9-12) and a new elementary (4-5). These two buildings would be constructed on the SWL Board owned land located at the corner of Smoke Road and Route 40. The following diagram shows the 179.455 acres and a conceptual drawing to help residents visualize and verify the location for such construction. The map below also notes wetland areas that will be left undisturbed by the construction.


An Indiana Bat study will be conducted by the District prior to locating a connecting road and sidewalk between the two campuses.
